## REMARKS

The figures of births and deaths shown in this statement for week ending the 13th Oct. 1956, relate to 210 towns with an estimated population of 28,729 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 66% of the total number of towns representing 69% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 17,834 and 6,277 representing birth and death rates of 32.3 and 11.4 per thousand of population respectively.

(a) States (Part A and C).—The data here relate to 174 towns with an estimated population of 24,367 thousands. Information about Assam, Madhya Pradesh, Orissa and West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 69% of the total number of towns representing 73% of the total population is

covered. The number of births and deaths recorded in these towns were 15,902 and 5,480 representing birth rates and death rates of 33.9 and 11.7 per thousand of population respectively. The table at the end gives the position by States. No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B).—The data here relate to 36 towns with an estimated population of 4,362 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 55% of the total number of towns representing 54% of the total population is covered. The number of births and deaths recorded in these towns were 1,932 and 797 representing birth and death rates of 23.0 and 9.5 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
